Summary

Results-driven **Senior React Developer** with **5+ years of experience** building scalable enterprise web applications in **financial services**. Expert in **React.js (v18)**, **TypeScript**, **Redux Toolkit**, **RTK Query**, and modern frontend architecture. Hands-on experience integrating **Generative AI** and **LLM-powered features** (Claude API, OpenAI GPT-4o) into production React applications. Track record of delivering measurable performance gains, architecting reusable component systems, and leading Agile engineering teams.

Technical Skills

Core React	React.js (v18) • React Hooks • Custom Hooks • Context API • React.memo • React.lazy / Suspense • React Hook Form • React Query
State Mgmt	Redux Toolkit • RTK Query • Context API
Languages	TypeScript • JavaScript (ES6+) • HTML5 • SCSS / CSS3
Performance	Code Splitting • Lazy Loading • react-window • useMemo / useCallback • Lighthouse Optimisation • Bundle Size Reduction
Gen AI	Claude API (Anthropic) • OpenAI API (GPT-4o) • Prompt Engineering • Streaming Responses • LLM Function Calling
Frameworks	Angular (v8–15) • Material UI • Tailwind CSS • CSS Modules
Testing	Jest • React Testing Library • Unit & Integration Testing
Backend	RESTful APIs • Node.js / Express.js • MongoDB • JWT Authentication
Tools	Git • Jenkins • CI/CD • Agile / Scrum • GitHub Copilot

Professional Experience

Wipro

May 2025 – May 2026

Senior React Developer

Bengaluru, India

- Architected **6+ scalable React.js 18 modules** using custom Hooks, reducing re-renders by **40%** via **useMemo**, **useCallback**, and **React.memo**; cut initial bundle size by **22%** with **React.lazy / Suspense** and **react-window** virtualisation.
- Integrated **Claude API (Anthropic)** and **OpenAI GPT-4o** into a React dashboard, enabling AI-powered document summarisation and smart search; implemented **SSE-based streaming** for real-time LLM output, reducing analyst review time by **35%**.
- Designed **Redux Toolkit + RTK Query** state architecture for 3 feature modules, eliminating **60%** of redundant API calls; built **TypeScript-first** component systems that reduced runtime type errors by **35%**.
- Built a **Vite-powered Micro Frontend** architecture enabling independent build and deployment of 3 React feature apps, reducing cross-team release conflicts and cutting CI build times by **40%**.
- Collaborated with backend engineers on **RESTful API contracts**, enabling seamless frontend integration and reducing cross-team integration defects by **30%**.
- Led Agile ceremonies for 6 engineers using **AI-assisted code review** (GitHub Copilot), improving sprint velocity by **20%** and reducing post-release defects.

Bajaj Finserv

July 2023 – May 2025

React Developer

Bengaluru, India

- Shipped a **Gen AI-powered loan eligibility assistant** (OpenAI API + React) reducing customer support queries by **28%**; delivered **5 critical product features** end-to-end with **React.js**, **TypeScript**, and **Redux Toolkit**, improving delivery efficiency by **20%**.
- Built a **reusable React component library** (15+ components, TypeScript + CSS Modules) adopted by 3 product teams, accelerating feature delivery by **40%**.
- Migrated 3 legacy modules to a **Webpack Module Federation** Micro Frontend setup, enabling independent deployments per team and reducing monolith release cycle time by **35%**.
- Developed **multi-step React Hook Form** workflows with Yup validation, reducing form errors by **25%**.
- Integrated **React Query** for server-state synchronisation and optimistic UI updates, improving perceived performance and UX responsiveness across loan and account management flows.

KPMG India

March 2021 – June 2023

Frontend Developer (React.js)

Bengaluru, India

- Built **8+ enterprise audit web modules** using **React.js** and **TypeScript**, maintaining 100% compliance with client data security standards across all deployments.
- Diagnosed and resolved **12+ critical performance bottlenecks** (bundle splitting, memoisation, debouncing), improving overall app responsiveness by **45%** across 3 client projects.
- Established **React.js coding standards and component architecture guidelines**; cutting code review cycles by **25%** and reducing onboarding time.

Education

National Institute of Foundry and Forge Technology (NIFFT)

2016 – 2020

Bachelors of Technology, Metallurgy and Materials Engineering

Ranchi, India
