Dubai, UAE | UAE Resident Visa Holder

Summary

Results-driven **Senior Angular Developer / Frontend Software Engineer** with **5+ years of experience** architecting, developing, and optimising scalable enterprise web applications in the **financial services domain**. Deep expertise in **Angular (v8–20)**, **TypeScript**, **RxJS**, **NgRx**, and modern component-driven architecture (Angular Signals, Standalone Components, Reactive Forms), with a strong track record of improving performance, scalability, and code quality through best-practice frontend engineering. Skilled at consuming and integrating RESTful APIs, leading cross-functional teams, and delivering high-quality, production-ready UI solutions at scale.

Technical Skills

Languages: TypeScript • JavaScript (ES6+) • HTML5 • SCSS/CSS3 • SQL

Angular Ecosystem: Angular (v8–20) • Angular Signals • Standalone Components • RxJS • NgRx • Angular Router • Reactive & Template-Driven Forms • Angular CLI

Frontend Architecture: Component-Based Design • State Management • Lazy Loading • Change Detection Optimization (OnPush) • Micro-Frontend Architecture • Responsive Web Design • Web Performance Optimization • Accessibility (WCAG/a11y)

Integration: RESTful API Consumption • JWT Authentication • Role-Based Access Control (RBAC) • HTTP Interceptors • Third-Party API Integration

Tools & Practices: Git • Jenkins • CI/CD Pipelines • Jasmine/Karma Unit Testing • Agile/Scrum • SOLID Principles • Design Patterns • Code Reviews • Webpack

Professional Experience

Wipro

May 2025 – Present

Senior Software Engineer (Angular)

Bengaluru, India

- Architected and delivered **6+ scalable frontend modules** using **Angular 18/20 Standalone Components** and **Angular Signals**, cutting unnecessary re-renders by **40%** and improving perceived load time across all major user flows.
- Spearheaded a performance optimization initiative — implementing **OnPush change detection**, lazy loading, and virtual scrolling — increasing **Lighthouse performance scores by 30%+** and reducing initial bundle size by **22%**.
- Designed and implemented **NgRx store architecture** for 3 complex feature modules, eliminating **60%** of redundant API calls and achieving consistent, predictable application state management.
- Integrated **RESTful backend services** and third-party APIs into Angular applications using typed HTTP clients and interceptors, reducing perceived response latency by **25%** through caching and optimistic UI updates.
- Engineered **CI/CD pipeline improvements** using Jenkins for the frontend build and deployment process, reducing deployment cycle time by **35%** and achieving zero-downtime production releases across sprint cycles.
- Led code reviews and Agile sprint ceremonies for a team of 6 engineers, enforcing SOLID principles and Angular best practices, **reducing post-release defects by 20%**.

Baraj Pinner

July 2023 – May 2025

Software Engineer (Angular)

Bengaluru, India

- Designed and implemented **5 critical product features** end-to-end across the full SDLC — requirements, development, QA, and production deployment — improving **team delivery efficiency by 20%** while meeting rigorous quality assurance standards.
- Engineered a **reusable Angular component library** (15+ components, TypeScript + SCSS) adopted by 3 product teams, accelerating feature delivery by **~40%** and ensuring UI consistency across products.
- Built and owned **Angular front-end modules** for core loan processing and account management — implementing **JWT-based authentication**, **RBAC-driven route guards**, and secure form workflows supporting **1M+ financial transactions** with zero critical security incidents.
- Implemented **HTTP interceptors**, **retry logic**, and **centralised error handling** across Angular services, reducing **unhandled UI error rates by 35%**.
- Optimised data-heavy Angular dashboards consuming **15+ backend endpoints** for financial reporting, reducing average **time-to-display time by 50%** and supporting real-time data access for 10,000+ daily users.

KPMG India

March 2021 – June 2023

Programming Analyst (Angular)

Bengaluru, India

- Developed and deployed **8+ enterprise web application modules** for audit and advisory clients using **Angular and TypeScript**, ensuring 100% compliance with client data security and regulatory standards.
- Built **Angular Reactive Forms** workflows with dynamic validation and multi-step data entry, reducing manual data processing time by **30%** for audit teams handling complex compliance datasets.
- Resolved **12+ critical performance bottlenecks** in Angular applications (bundle size reduction, change detection tuning, API throttling), improving application responsiveness by **45%** across 3 client projects.
- Mentored **4 junior developers** on Angular architecture, SOLID principles, and TypeScript best practices; elevated overall team code quality, reducing code review revision cycles by **25%**.

Education

National Institute of Foundry and Forge Technology (NIFFT)

2016 – 2020

B.Tech, Metallurgy and Materials Engineering

Ranchi, India

Certifications

- Learning TypeScript – LinkedIn Learning
- SQL – LinkedIn Learning
- Excel Essential Training (Microsoft 365) – LinkedIn Learning
